Were there any changes made to your Women's and Children Program?
Yes No

If yes, please answer the following and use additional sheets if necessary:

What specific changes were made to your program?

Why these changes were made?

Describe the impact of these changes?

Provider: _____

What primary medical care (including pre-natal care and child care arrangements) is available for women receiving substance abuse services?

Is pediatric care (including immunizations) available for children?

Are gender specific substance abuse treatment and other therapeutic interventions accessible to address issues of relationships, sexual and physical abuse, parenting, and child care while receiving these services? (Please describe the interventions and how they differ from other treatment services offered).

Provider: _____

Please describe the therapeutic interventions used and the number of custodial children of women in treatment who received these interventions.

Are there sufficient case management services available to ensure access to the aforementioned services? Please indicate the number of women and children involved in these services.

Are adequate transportation services available to ensure access to additional services? Again, please indicate the number of women and children involved in this service.

Provider: _____

Describe how your Program is working to ensure improvements in the following:

Completion of treatment episodes.

Babies of pregnant women being born drug free.

Children receiving effective and meaningful therapeutic intervention.

Provider: _____

Systems collaboration.

Other service improvements either implemented or in the process of implementing.

How do you perform marketing of services in the community to potential referral sources?
